

The Last Great Ape Organization – LA GA

January 2010 Report

Highlights

- Operations started against **4 international parrot traffickers** in Douala – Littoral following the seizure of more than **1000 parrots**.
- **A principal Internet wildlife dealer** arrested in Buea – South West Region
- **3 cases sentenced this month against 4 dealers**.

General

This month was marked by a special focus on international illegal trafficking of African Grey parrots and Internet wildlife trafficking.

An operation was started against **4 international illegal traffickers of African Grey parrots. 2 of the traffickers are well known in Cameroon with 2 other accomplices one of whom is a Nigerian national.** The traffickers are well connected to a big export network with accomplices in the Democratic Republic of Congo from where falsified government documents and CITES Permits used for the illegal exportation are issued. From all indications, they also have accomplices in the control posts at the airport through which the parrots pass without any proper control; and Ethiopian Airlines used for the transportation of the parrots seems to facilitate these illegal deals. The Airlines chose to move shipment without the required documents and we assume that it is not because of lack of knowledge pertaining to the requisite documents used for wildlife exportation. **More than 1000 African Grey parrots were seized at the Douala International airport** ready to be exported to Bahrain and Kuwait with the collaboration of the Douala Judicial Police. This seizure furthermore validated information we had before about the organized chain of complicity in the parrot trade and how **white-collar criminals thrive on this complicity gaining a legitimate cover and eliminating the risk factor.** The parrots will be progressively released into the wild by the Limbe Wildlife Center where they were taken.

A principal Internet wildlife dealer engaged in fraud and illegal wildlife trade over the Internet was arrested in Buea – South West Region. He was arrested for falsifying government documents and CITES Permits that he used to lure a victim in the Netherlands to pay for a capuchin monkey which he did not have. His connection to other forms of fraud including illegal immigration and adoption scams is still being investigated.

3 cases were sentenced this month against 4 wildlife dealers. The Court of First Instance of Bamenda – North West Region sentenced **2 Internet wildlife dealers** who were arrested trying to sell a chimp over the Internet to a client in USA using falsified government documents and CITES Permit; and 2 sentenced by the Court of First Instance of Djoum – South who were arrested in Djoum for illegal killing and trading in protected wildlife species.

In a meeting held by the LAGA family, the **LAGA Director introduced weekly meeting sessions.** Other meetings and the agendas can be initiated by any LAGA family member at any time. These meetings are geared towards identifying problems and proposing solutions to these problems so as to ascertain the smooth running of the organization. In a separate meeting, **a new procedure, rules and regulations** were put in place **governing operations so as to increase their effectiveness.**

Investigations

- **22 investigations** of varying lengths were carried out in **8 Regions** of Cameroon- North, West, South West, South, East, Littoral, Adamawa and Center.

- **Investigations are still ongoing pertaining to 3 targets** that are implicated in trying to illegally export the more than 1000 parrots seized at the Douala International Airport destined for Bahrain and Kuwait.
- **Internet Investigations led to 1 successful operation** after targeting an Internet wildlife dealer in Buea – South West Region. 1 other Internet wildlife dealer engaged in fraud in Bamenda – North West Region was targeted. Investigations are still ongoing.
- An International Investigator volunteered this month for a special mission to track dealers in lion skin, ivory, chimps and products of other protected wildlife species in Cameroon especially in a notorious and violent hotspot such as Foumban in the West, an area difficult to penetrate and that serves to connect ivory dealers in the major towns of Douala and Yaounde. He succeeded in contacting dealers in Foumban, and also succeeded in locating a highly placed government official engaged in animal trafficking. More investigations are ongoing to arrest the targets.
- 2 new candidates tried in the field this month with encouraging results. Field tests will continue with more candidates as the department is experiencing a shortage in effective investigators.

Operations

1 operation was carried out this month against **1 subject**, and another started against **4 subjects**.

- **29/01/10** – A principal Internet wildlife dealer engaged in fraud and illegal wildlife trade over the Internet was arrested in Buea – South West Region.
